

Test Scenarios

Project Title

TaskFlow – Mobile Task Management Application

Scenario 1 – Launch the Application

Objective: Verify that users can successfully open the application.

Task:

- Open the TaskFlow application.

Expected Result:

- The Splash Screen is displayed.
-

Scenario 2 – Login

Objective: Check whether users can log in without confusion.

Task:

- Enter the email address.
- Enter the password.
- Tap the **Login** button.

Expected Result:

- The Home Screen opens successfully.
-

Scenario 3 – View Today's Tasks

Objective: Determine if users can easily find their daily tasks.

Task:

- Review the task summary.
- View the list of today's tasks.

Expected Result:

- Users can clearly see pending and completed tasks.
-

Scenario 4 – Add a New Task

Objective: Verify that users can create a new task.

Task:

- Tap the **Add (+)** button.
- Enter a task name.
- Select a due date.
- Choose a priority level.
- Add optional notes.

Expected Result:

- All task information is entered successfully.
-

Scenario 5 – Save the Task

Objective: Ensure users can save the newly created task.

Task:

- Tap the **Save Task** button.

Expected Result:

- The application returns to the Home Screen and the new task is added to the task list.
-

Scenario 6 – View Completed Tasks

Objective: Check whether users can access completed tasks.

Task:

- Open the **Completed Tasks** section.

Expected Result:

- The list of completed tasks is displayed.
-

Scenario 7 – Return to Home

Objective: Verify navigation back to the Home Screen.

Task:

- Tap the **Back** button.

Expected Result:

- The Home Screen is displayed successfully.
-

Overall Success Criteria

The usability test is considered successful if:

- Users complete all tasks without assistance.
- Navigation is simple and intuitive.
- Users understand the interface easily.
- No major usability issues are observed during testing.
